

Anahit Poghosyan

Web Developer

I am a motivated and organized person. I like learning new things and always try to do my best. I enjoy working in a team and helping others. I always finish my work on time and try to stay calm in difficult situations. I want to grow and improve my skills.

I created e-voting system using blockchain. Building that project was a real challenge for me, as I was working with unfamiliar technologies. Still, I successfully completed it and gained valuable experience in problem-solving and learning new tools.
